

Jericho Energy Task Force
Agenda for November 9, 2016, 7 p.m.
Jericho Town Hall

Task Force Members present: Larry Lamb, Phyl Newbeck, Reed Sims, Ceilidh Peden-Spears

1. Icicle Contest

The JETF is planning to hold our icicle contest this year. It better snow.

2. Winter movies/events

On January 26 at 7 p.m. we will be showing *Just Eat It* at the Deborah Rawson Memorial Library. This movie is about food waste and the Chittenden Solid Waste District will collaborate with us for it. Leonardo DiCaprio narrates a movie called *Catching the Sun* which we hope to bundle with a presentation by Chris West on optimal placement of solar panels on March 16. We also talked about a possible presentation on air-to-air heat pumps.

3. VNRC presentation

Hannah Huber of VNRC is interested in leading a discussion for JETF. We are hoping that she might be available on February 16, but that is not yet set.

4. Future plans

We talked about possible future presentations:

- Another electric car presentation since it was a big hit.
- Bicycle commuting workshop with Local Motion in April
- Repeat of the Green Mountain Power presentation, perhaps with a discussion of air conditioning in the early spring.
- Composting workshop with help from the CSWD.
- A potential talk by Tom Moore of Underhill on ways to measure energy efficiency and/or other things we should know.

There was a question about whether we should be doing more to educate ourselves so that we can become advisors to the community.

Our next meeting will be Wednesday, December 14 at 7 p.m.
